SUMMARY

Computer Engineering student skilled in programming, database systems, and modern web technologies. Hands-on experience in backend development, API design, and data analysis, focused on building scalable and performance-driven applications. Understanding of core concepts like OOP, DBMS, and system design, with a problem-solving mindset.

EDUCATION

Sinhgad Institute of Technology, Lonavala	2022 – 2026
Bachelor of Engineering in Computer Engineering (CGPA: 8.71 / 10.0)	Pune, India
Higher Secondary Certificate (HSC) – Science	2022
Shri Nath Junior College, Paithan MSBSHSE (85.83%)	Maharashtra, India
Secondary School Certificate (SSC)	2020
Arya Chankya Vidhya Mandir, Paithan MSBSHSE (95%)	Maharashtra, India

WORK EXPERIENCE

Technical Intern - Infinova Technologies	Sep 2025 – Feb 2026
- Designed social media creatives, web layouts, and UI components for client projects using Figma, improving visual consistency across web and app interfaces. - Collaborated with developers and clients to translate design requirements into practical, web-ready, usability-focused layouts.	
Software Development - Genesys Lasers Pvt. Ltd.	Feb 2025 – Apr 2025
- Developed and deployed an Inquiry Management System using PHP and MySQL to track customer inquiries and sales pipeline data end-to-end. - Developed and maintained web applications using HTML, CSS, JavaScript, PHP, and MySQL for a core manufacturing company; handled responsive UI, form logic, and backend integration.	
Analyst Intern – Rising Education	May 2024 – Jul 2024
- Cleaned and structured 10,000+ MHT-CET student records using Python and Excel; normalized data by college, category, and admission criteria to improve data quality. - Prepared datasets for a UG college recommendation system, enabling data-driven admission outcome predictions.	

PROJECTS

AstroLogic - Astrology Computation Platform	Link
Full-stack AI astrology system using Python and FastAPI with Swiss Ephemeris for planetary calculations and AI-based NLG for real-time insight generation. Designed modular RESTful APIs for chart generation, prediction building, and prompt-engineered responses.	
LAN Dropbox - Local Network File Sharing Web Application	Link
Developed scalable and efficient backend services using Python, ensuring optimized request handling and low-latency communication. Integrated QR code authentication for instant device connectivity without manual configuration. Developed modules for file upload/download management with logging and activity monitoring	
School Management System	Link
Developed a desktop application with authentication, student, attendance, and exam modules using layered architecture. Implemented relational database design with JDBC, including CRUD operations, attendance analytics, and rank generation using SQL.	

SKILLS

Programming Languages	Java, Python, C++, JavaScript, SQL, PHP
Web Technologies	HTML5, CSS3, Bootstrap, JavaScript
Frameworks & Libraries	FastAPI, Flask, Spring Boot (basic), React
Databases	MySQL, MongoDB
Tools & Platforms	Git, GitHub, Power BI, Excel, Jupyter Notebook, Figma, XAMPP
Core Concepts	OOP, Data Structures, DBMS, REST APIs, EDA, Data Visualization, Agile, System Design

CERTIFICATIONS & ACHIEVEMENTS

Certifications	Microsoft Azure Fundamentals AZ-900 Data Analytics Program - Godrej Infotech Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
Achievements	UK IPO Design Registration No. 6455672 (Jul 2025) Published research paper in IJSART (May 2025) NSS Student Coordinator State Level - RMW Coordinator Best Volunteer Award Best Outgoing Student
